VSM® services

Whether it be maintenance, optimisation or replacement parts – even after you have purchased your VSM® packaging solution, we will still be on hand to offer competent and specialist advice.

For every VSM® system, we provide a comprehensive range of varied service packages and additional services. These are constantly being adapted to meet your individual requirements and wishes.

Components for your success

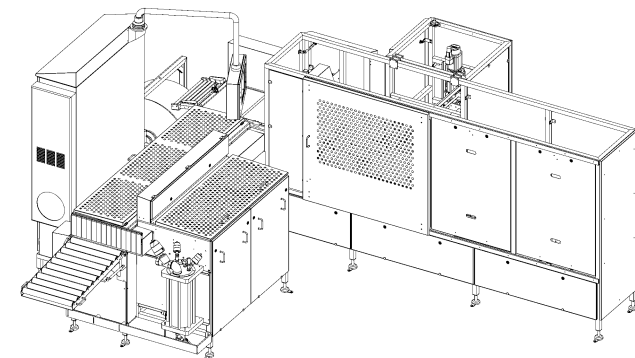

A variety of components and service elements offer the ideal opportunity to ensure optimum performance and availability of your VSM® machine throughout its entire service life.

Our service packages include inspection, servicing and maintenance, as well as overhauling and optimisation of the system. The offer is also expanded to include seminars and training for operating and technical personnel.

Alongside the special services offered by our experienced team, the installation of original replacement parts and the optimum performance of your system, you will also profit from the attractive pricing offered by these packages within the framework of a servicing session.

Your advantages

- ✓ **Professional inspection** of the VSM® system by specialised MBM innovations service personnel
- ✓ **Maximum availability** of the machine thanks to the timely exchange of replacement parts and consumables
- ✓ **Extension of the lifecycle** thanks to the use of **early diagnostics and preventive measures**
- ✓ **Retro-fitting of technical developments** and competent **optimisation** of the system
- ✓ **Intensification** and repetition of operating, safety and technical **training**
- ✓ **Cost savings** as a result of **optimum performance** of the packaging machine
- ✓ **Simple and convenient planning** in maintenance intervals and production breaks

VSM® 5005-R

VSM® Service Stay

The basic package for regular maintenance and inspection of your VSM® system, with attractive conditions.

Replacement parts and stock-keeping

Quick and simple delivery of original replacement parts is what really matters in an emergency. Optimise your stock-keeping and minimise downtimes with our Storage Plus packages.

Retrofitting and optimisation

Even older machines can profit from technical innovations. With our individual upgrade packages, we can even take your existing systems one step further.

Training and seminars

Correct operation and maintenance on a day-to-day basis are key when it comes to ensuring smooth production operations. Make use of our Fresh-Up packages to provide your operating and technical personnel with intensive training.

Our services and packages are available for all VSM® machine types, whether they be a semi-automated or fully automated packaging solution.

Schedule servicing conveniently for defined production breaks or intended maintenance periods. Your service session can be designed according to your wishes by simply booking additional packages. We would be happy to cater to your individual needs.

Of course, our services may also be used over a longer period of time within the framework of a maintenance contract. We would be happy to advise you regarding the perfect service packages for your VSM® vacuum packaging system.

Our machines are characterised by our considerable knowledge, technology and expertise, but also by a large dose of passion, from the very start. For this reason, it is particularly important to us that you also profit from our high quality requirements even after purchasing, thanks to our services.

Find out about which service is best suited to you and your VSM® system!
